

Aborted Fetal Material Used in Vaccines and Medicines

Children of God for Life has provided the following science evidence which is recorded in the vaccine manufacturer package inserts, science publications and patents.

As early as 1936, forced abortions were performed under the US “Model Eugenic Sterilization Law” of 1922 and used in polio research. (*Forsaking God for the Sake of Science*) Quoting and referencing as follows:

Albert Sabin:

“A new approach was made by the use of 3- to 4-months-old human embryos, obtained aseptically by Cesarean section...The brain and cord, the lungs, kidneys, liver, and spleen were stored in the refrigerator, fragments of these tissues being taken for the preparation of media at 3-day intervals.”¹

Drs. Thicke, Duncan, Rhodes:

“Human embryos of two and one-half to five months gestation were obtained from the gynaecological department of the Toronto General Hospital...No macerated specimens were used and in many of the embryos the heart was still beating at the time of receipt in the virus laboratory.”²

Dr Enders, Weller, et al Nobel Prize for polio research:

“Embryos of between 12-18 weeks gestation have been utilized. Rarely tissues were obtained from stillborn fetuses, or from premature infants at autopsy...In the experiments 3 sorts of embryonic materials were used: elements of skin, connective tissue, muscle; intestinal tissue; brain tissue...Whenever possible the embryo was removed from the amniotic sac..., transferred to a sterile towel and kept at 5 C until dissected.”³

RA273: Rubella Virus used in Rubella and MMR vaccines⁴

- **R=Rubella, A=Abortion, 27=27th aborted baby, 3=3rd Tissue where virus was isolated**
- 6 weeks gestation; sex not recorded
- Isolated from kidney by Dr. Stanley Plotkin
- **40 more elective abortions for rubella virus isolation by T.H. Chang,⁵ (67 total) ***

WI-38: Wistar Institute, Specimen No. 38, 32nd Abortion^{6, 7}

- Abortion performed in Sweden and shipped to Leonard Hayflick, Wistar Institute, Philadelphia
- Lung tissue 3 months gestation female
- Used to culture RA273 for rubella and MMR vaccines *

*** NOTE: 67 abortions to produce rubella virus plus 32 abortions to produce the cell line for cultivation means there was a total of at least 99 elective abortions to create the rubella vaccine alone.**

WI-26: Wistar Institute, Specimen No. 26, 20th Abortion⁸

- Abortion performed in Sweden and shipped to Leonard Hayflick, Wistar Institute, Philadelphia
- 3 months gestation male
- Lung Tissue
- Used in recombinant DNA for Enbrel

WI-44: Wistar Institute, Specimen No. 44, 38th Abortion ⁹

- Abortion performed in Sweden and shipped to Leonard Hayflick, Wistar Institute, Philadelphia
- 3 months gestation female
- Lung tissue

Dr Stanley Plotkin – open testimony on use of 76 aborted fetuses, ¹⁰

MRC-5: Medical Research Council, Abortion No. 5 ¹¹

- Abortion performed in UK for “psychiatric reasons”
- Lung Tissue, 14 weeks gestation male
- Used in (some) Polio, Rabies, Chickenpox, Hepatitis-A, Zostavax for shingles vaccines

HEK-293: Human Embryonic Kidney, Specimen No. 293 ¹²

- Abortion performed in Netherlands
- Kidney Tissue; Gestation age not recorded
- Used in drugs, Pulmozyme, Repro, Eloctate, rhFVI, Nuwiq and Ebola vaccines under development

IMR-90: Abortion in US; Coriell Cell Repository, ¹³

- Designer cell line to replace WI-38
- 16 weeks gestation female
- Lung Tissue

IMR-91: Abortion in US; Coriell Cell Repository, ¹⁴

- Designer cell line to replace MRC-5
- 12 weeks gestation male
- Lung Tissue

Lambda.hE1: Abortion in US for “psychosocial indications” ¹⁵

- Second Trimester abortion
- Liver Tissue
- Used in drugs Procrit, Epoetin alfa, Epogen, Aranesp, Darbepoetin alfa

PER C6: Abortion in Netherlands, “mother wanted to get rid of the fetus, father unknown” ¹⁶

- 18 weeks gestation
- Retinal tissue
- Designed specifically for the pharmaceutical industry; Used in Ebola vaccines under development

WALVAX2: Abortion in China, 9th Abortion ¹⁷

- 3 months gestation female
- Lung tissue
- Designed specifically to replace depleting supply of WI-38 and MRC-5
