

The Campaign for Ethical Vaccines & Medicines
STOP ABORTED FETAL CELL LINES IN MEDICAL PRODUCTS

For over 30 years, the pharmaceutical industry has been producing medical products using cell lines derived from aborted babies. These products are used to treat: **Rheumatoid Arthritis, Ebola, Cystic Fibrosis, Polio, Rabies, Rubella/MMR, Chickenpox, Hepatitis-A, Shingles, Acute Respiratory infection and Hepatitis A-B combo.** Of these, the following have **NO MORALLY PRODUCED OPTION AVAILABLE TO THE PUBLIC: Hepatitis-A, Rubella/MMR, Chickenpox, Acute Respiratory illness.** Morally available sources can and should be used.

Therefore, we, the undersigned, petition [Barr Labs](#), [Merck & Co](#), [Sanofi Pasteur](#), [Glaxo SmithKline](#), [Eli Lilly](#), [Amgen](#), [Genentech](#) & [Octapharma](#) to produce safe, effective alternatives for the existing vaccines and medical products and to use ethical alternatives in future products. We further petition the FDA to process any such application expeditiously. If you agree that manufacturing medicines in this manner is not only illicit, but also jeopardizes public health and violates your moral right to access ethically produced alternatives, please sign this petition.
